

VII. Feedback Mailers Received in Calais LNG Office

Your feedback Is Important

Public participation plays a crucial role in what will be a rigorous and thorough review of our application to construct and operate an LNG facility in Calais.

State and federal regulations require such applications to include a comprehensive public participation and review process in order to identify a wide variety of potential impacts that may be caused by the construction and/or operation of an LNG facility.

Our project team is eager to hear your feedback, questions or concerns about our proposal. We look forward to the many public meetings we will be scheduling during the coming months.

The project Web site (www.CalaisLNG.com) features project updates and detailed information about our application, including a section for public comment and questions.

We invite you to fill out the form below and mail it to us. You may also contact us by phone 207-214-7074 or visit us on the web at www.CalaisLNG.com. Thank you for your interest in our project!

COMMENTS/QUESTIONS:

AT This early stage of development,
I support this project and I look
forward to working with Calais LNG.
